

CANANDAIGUA PARKS AND RECREATION MASTER PLAN

Canandaigua, New York

Passero Associates, working with the Town and our partners on the team, is creating a Parks and Recreation Master Plan to meet the current and future recreational needs of the Town's residents. The Parks and Recreation Master Plan will identify the Town's role as one of the many suppliers of leisure services and provide a workable guideline for the Town to provide parks, recreational facilities and services within its resources and capabilities. The plan is a cooperative effort between the community and the consultant.

The plan will: identify present and anticipated park and recreational needs and capabilities; guide the provision of land and facilities; identify underserved areas of the Town and possible alternative park locations; establish directions for implementing, developing, financing, operation of and maintenance of facilities and programs; guide the most cost effective acquisition and development of recreational facilities; provide necessary documentation of recreational needs for potential sources of assistance; serve as a basis for short and long range capital planning and budgets; and inform Town residents and officials of its recreational needs, efforts and capabilities.
