

ELIZABETH WENDE BREAST CLINIC MRI SUITE

Rochester, New York

Passero Associates provided architectural and engineering services for the Elizabeth Wendé Breast Clinic MRI Suite. A state-of-the-art diagnostic facility that is a newly built addition to the existing clinic. The MRI Suite occupies 1,500 SF and is accessible from the existing facility as well as directly from the exterior. The Suite includes a patient screening area, patient holding areas and a control room with full view of all nearby doors to eliminate potential problems.

The MRI Suite was designed to meet all the safety and convenience requirements of the medical staff and patients. In planning an MRI Suite, the magnet becomes a central design safety consideration.
