

## MARINA DRIVE

*Irondequoit, New York*

Passero Associates provided design services for Marina Drive, a 0.5 kilometer two-lane access road that was part of Monroe County Department of Transportation's O'Rorke Bridge project. Marina Drive provided access to the Genesee Riverfront properties. The new road was built partially over an old landfill, which required special geotechnical engineering to address differential settlement.

**Client:**  
Town of Irondequoit

**Project Cost:**  
\$1,400,000

**Completion Date:**  
2002

**Services Provided:**
