

MONROE COUNTY PURE WATERS TUNNELS

Rochester, New York

Passero Associates provided a survey layout of these Sewer Tunnels on Culver Road and Norton Street for Monroe County Pure Waters. Passero also provided alignment and surface checks. The depth of the Tunnels underground presented challenges in beginning the projects.

These projects consisted of sewer overflow tunnel systems within the City of Rochester. Passero's involvement in these projects was to enter the Tunnels during the drilling portion and check the alignment of the Tunnels. Passero's crew entered the Tunnels at night, during the shutdown period, and checked the alignment.
