

Industrial Hygiene Services

Commitment to our Clients

Passero Associates will provide its most experienced, knowledgeable and result oriented individuals to manage and perform Industrial Hygiene Services for our valued clients.

The focus of our staff's efforts will be to ensure that we meet or exceed your expectations for:

- Establishing a understandable line of communication with our clients
- Technical competence and budgetary constraints
- Meeting Project schedules and providing quality deliverables

Environmental and Industrial Hygiene Project Manager

Passero Associates Environmental and Industrial Hygiene Department is managed by Mr. Arpad Kolozsvary, an Industrial Hygienist and a Registered Environmental Manager since 1991. Mr. Kolozsvary has more than 15 years of experience in the Industrial Hygiene field (20 years in the environmental field) and has been involved in numerous projects for attorneys, insurance companies, industrial and commercial clients. Mr. Kolozsvary has served as president of the CNY Chapter of the American Industrial Hygiene Association and is currently on the Board of Directors. Arpad completed his OSHA/RCRA 40-hr Hazardous Waste Training in 1986 and annually attends the 8 hour refresher. Please forward all inquires to: akolozsvary@passero.com

Members of our Environmental and Industrial Hygiene staff are qualified to completely assess worker protection needs and perform detailed analyses. Hazard assessments include recognition of hazards, identification and quantification of specific exposures, development of control measures to reduce or eliminate potentially hazardous exposures, and verbal and written communication of the survey results. As a part of the industrial hygiene exposure assessment, we compare health hazard assessment data with our clients' occupational health programs to determine that the scope, content, training, and documentation for these programs are consistent with recognized industry practices and government regulations. Based on the result of the assessment, we will develop programs that will meet OSHA and other requirements.

Overview of Industrial Hygiene Capabilities

- Development of exposure and risk assessment strategies: process and work activity evaluations, product toxicity characterization, investigation into frequency and duration of exposures, work schedules, and general and local exhaust ventilation dynamics
- Development and oversight of corporate environmental health and safety programs including confined space entry, respiratory protection, and hazard communication.
- Industrial hygiene and safety audits to evaluate worksite health and safety practices including evaluation and recommendation of workplace controls
- Regulatory compliance monitoring and exposure assessments for chemical, physical, and biological hazards
- Health and safety plan (HASP) development and site monitoring for the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and Resource Conservation and Recovery Act (RCRA)
- OSHA, private-party, and litigant dispute resolution for industrial, public, and institutional settings for chemical and microbiological exposures

Passero Associates has extensive experience providing Industrial Hygiene services for developers, insurance companies, commercial and industrial clients. We are staffed to investigate both chemical and biological exposure problems and have successfully completed over 30 projects this year. We have included a list of services provided by Passero Associates and a brief summary of some of our projects.
